

Lesson 3.5 - Quiz Sheet

Scenario 1

You are in the street with your mates when one of them finds an old pair of shoes. They tie the laces together and try to throw them on to a power line. Do you:

- a) Refuse the risk by telling them 'no' and go home knowing that they will tease you about it tomorrow?
- b) Not wanting to be teased, you take part knowing that they could damage the power line?
- c) Avoid the risk by 'accidentally' throwing the shoes over a wall when it's your turn so they can't do it anymore and reduce the risk of an accident?

Scenario 2

You are playing out with your mates near a substation. Your mates dare you to break the door open and go inside. Do you:

- a) Refuse the risk by telling them 'no' and going home, even though you know that they will tease you?
- b) Take the risk and do it, knowing that it is dangerous?
- c) Avoid the risk by talking your mates out of it by suggesting something else to do?

Scenario 3

You hear that there are people in the area pinching a bit of metal from substations. One of your friends was given £50 to act as a 'look out' and they might be able to get a job for you. Do you:

- a) Refuse the risk by saying 'no' and going home even though you know that you may be teased?
- b) Take the risk even though you know that is very dangerous and may lead to someone getting injured or you getting into trouble?
- c) Avoid the risk by telling him that you can't because you have to go out with your parents that night?
